Computing and Software Development student with hands-on experience building full-stack web applications, REST APIs, and relational databases through coursework and projects. Previous healthcare and self-employment experience developed strong problem-solving, communication, attention to detail, and a people-focused mindset.

EDUCATION

Lake Washington Institute of Technology — Kirkland, WA

Bachelor of Applied Science, Computing and Software Development | Expected Jun 2027

Associate of Applied Science – Transfer, Computing and Software Development | Jun 2025

Current GPA: 3.9 | AAS-T Honors: Summa Cum Laude | Phi Theta Kappa Honor Society

Relevant Coursework: Algorithms & Data Structures, Data Analytics, Software Engineering, Database Modeling & Design, Security Foundations

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL

Web Technologies: React, Node.js, Express, HTML/CSS, REST APIs

Databases: MySQL

AI Tools: GitHub Copilot, ChatGPT, Claude

Tools: Git, Jira, VS Code

PROJECTS

Student Attendance Tracker Web App | Team Coursework Project

- Collaborated on a 6-person team to build a React, Express, and MySQL attendance system with 4-digit PINs, QR code check-in/check-out, and timestamped records.
- Designed the MySQL schema and ERD, implemented REST API functionality for adding students and authorized adults, connected the administrator login form to backend credential verification, updated QR code handling, and improved the UI layout, alignment, and readability.
- Led project documentation; used Jira and GitHub for collaboration; continued improving the project independently.

Expense Tracker Web App | Coursework Project

- Implemented REST API handlers using JavaScript and Node.js and connected them to MySQL, allowing users to add, view, edit, and delete their own expenses and categories.
- Added multi-user registration and login with secure password hashing, JWT authentication, and client-side token handling; wrote Vitest tests and improved the UI layout and styling.

Maze Generator and Solver | Coursework Project

- Implemented randomized maze generation and a depth-first search solver with stack-based backtracking in C++, removing unsuccessful paths while preserving the final solution.
- Managed maze walls, visited cells, path tracking, and a dynamic 2D grid; used OpenCV to animate the maze as it was generated and solved, with CMake for build configuration.

EXPERIENCE

Self-Employed Infant & Child Wellness Provider — Rostov-on-Don, Russia | Jan 2019 – Nov 2021

- Provided wellness-focused support for 8-12 children per day, including infants and young children, through movement exercises, infant massage techniques, water comfort, and basic swimming activities.
- Communicated with parents, managed appointments, and adjusted services based on each child's needs.

Retail Pharmacist — Pharmacy, Rostov-on-Don, Russia | Sep 2017 – Nov 2018

- Assisted up to 100 customers per day with medication purchases and guidance, developing strong customer communication and problem-solving skills.

Compounding Pharmacist — Government Pharmacy, Rostov-on-Don, Russia | Dec 2015 – Sep 2017

- Prepared compounded medications in batches of 30–50 units daily, as well as customized prescription-based preparations, including suppositories and ointments, according to pharmacy procedures and safety standards.
