Software Engineering student focused on full-stack web development, with hands-on experience building web applications, REST APIs, and relational databases through coursework and projects. Strong problem-solving, communication, and attention-to-detail skills developed through previous healthcare and self-employment experience.

EDUCATION

Lake Washington Institute of Technology — Kirkland, WA

Bachelor of Applied Science, Computing and Software Development | Expected Jun 2027

Relevant Coursework: Software Engineering, Web Application Development, Database Modeling & Design, Security Foundations

Lake Washington Institute of Technology — Kirkland, WA

Associate of Applied Science – Transfer, Computing and Software Development | Jun 2025

GPA: 3.91 | Degree Honors: Summa Cum Laude | Phi Theta Kappa Honor Society

Relevant Coursework: Algorithms & Data Structures, JavaScript, HTML/CSS, SQL, Java Programming

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL

Web Technologies: React, Node.js, Express, HTML/CSS, REST APIs

Databases: MySQL

Tools: Git, Jira, VS Code

PROJECTS

Student Attendance Tracker Web App | Team Coursework Project

- Collaborated on a 6-person team to build a React, Express, and MySQL attendance system with 4-digit PINs, QR code check-in/check-out, and timestamped records.
- Designed the MySQL schema and ERD and implemented REST API functionality for adding students and authorized adults.
- Connected the administrator login form to backend credential verification, updated QR code handling, and created and maintained project documentation.

Expense Tracker Web App | Coursework Project

- Implemented REST API handlers using JavaScript and Node.js and connected them to MySQL, allowing users to add, view, edit, and delete their own expenses and categories.
- Added multi-user registration and login with secure password hashing, JWT authentication, and client-side token handling; wrote Vitest tests and improved the UI.

Maze Generator and Solver | Coursework Project

- Implemented randomized maze generation and a depth-first search solver with stack-based backtracking in C++, removing unsuccessful paths while preserving the final solution.
- Managed maze walls, visited cells, path tracking, and a dynamic 2D grid; used OpenCV to animate the maze as it was generated and solved, with CMake for build configuration.

EXPERIENCE

Self-Employed Infant & Child Wellness Provider — Rostov-on-Don, Russia | Jan 2019 – Nov 2021

- Provided wellness-focused support for approximately 8-12 children per day, including infants and young children, through movement exercises, infant massage techniques, water comfort, and basic swimming activities.
- Communicated with parents, managed appointments, and adjusted services based on each child's needs.

Retail Pharmacist — Pharmacy, Rostov-on-Don, Russia | Sep 2017 – Nov 2018

- Assisted up to 100 customers per day with prescription and over-the-counter medication purchases, provided basic medication guidance, and helped organize medications and pharmacy inventory.
- Developed strong patient communication, customer service, and problem-solving skills in a healthcare environment.

Compounding Pharmacist — Government Pharmacy, Rostov-on-Don, Russia | Dec 2015 – Sep 2017

- Prepared compounded medications in batches of approximately 30-50 units daily, as well as individual prescription-based preparations, including suppositories, ointments, and other customized preparations.
- Measured, mixed, packaged, and labeled medications according to pharmacy procedures and safety standards.
